Work Experience

FloSports

Full Stack Software Engineer
Dev Lead
Sep 2022 - Present

I am currently working at FloSports as a full stack Software Engineer on the customer experience team. While at FloSports, I have worked on a range of projects, some of which have increased YOY page views for the company by >50% and monthly subscriber revenue by >80%.

Unbridled

Web Developer
Mar 2022 - Sep 2022

I worked as a web developer for Unbridled Solutions, an event solutions and productions company. I worked on the web development team in charge of delivering a wide range of digital solutions that were often highly tailored specifically to the event client's needs.

Hoamsy

Software Engineer Intern
Sep 2020 - Feb 2021

Hoamsy is a roommate searching and apartment listing application in Boston, MA where I worked as an intern on the web application development team. While at Hoamsy, I worked on both front-end and back-end projects and implemented a variety of new features and UI updates for the platform from scratch.

Freelance

Web Developer

Sep 2023 - Present

Working as a freelance web developer to help support digital agencies on web-based projects as a white label web developer.

Coursework

Senior Capstone

Spring 2021

Worked closely alongside three other Computer Science students as the front-end developer to create a blockchain-based secure election voting system using Vue and Node.js.
